WIRELESS INFRASTRUCTURE LINE LIST Southeast / Mid-Atlantic

Concealed & Standard Poles, RF Optimized Concealments, shrouds, mounts for Small Cell/C-RAN, 4G/5G deployments. PIM/Interference mitigation solutions that include PIM optimized hardware, & Test/Measurement tools.

Specialty/Custom antennas, combiners, duplexers, filters for Carriers, Land Mobile Radio, Public Safety, Utility, Contractor & Amateur Radio customers.

Fiber solutions including CPRI interface panels, bulk fiber cable, connectors, and custom optical cables for telecom applications. Fiber enclosures, trays, splicers, Test & Measurement tools & cleaning kits/accessories.

High performance Small Cell/C-RAN Directional antenna solutions that include multi port/band, cannisters, mini cannisters, whips, mini panel sand strand mount antennas for 4G/5G network densification deployments.

Fiber, power & hybrid cabling for Macro, & Small Cell/C-RAN 4G/5G projects. Fronthaul, fiber capacity solutions & passive optical components: multiplexers, couplers, splitters, switches, adapters, & attenuators. RF connectors, jumpers, lightning protection, antennas, components, & RF/GPS over Fiber solutions.

Solutions that improve wireless networks by automatically canceling PIM, wideband & many other types of interference to increase network capacity & improve the end-user experience. These software applications embed patented algorithms that condition the wireless link.

4G/5G RF conditioning solutions that include Interference Filters, Combiners (dual band, multi band, same band), Tower Mounted Amplifiers, & AISG/RET Cables. Test/Measurement solutions include portable and bench PIM analyzers, interference hunting solutions and RF cable/antenna analyzers.

4G/5G RF Lens, multi beam, patented antenna technology that offers ultra high-performance, ultra high-capacity, high-throughput antenna solutions for macros, venues, stadiums & arenas.

WIRELESS INFRASTRUCTURE LINE LIST Southeast / Mid-Atlantic

High-performance, high efficiency, feature-rich Macro antenna solutions for 4G/5G operators & OEM's that make networks more reliable. Complete multi port/band, wind load optimized macro antenna solutions with superior reliability.

Microwave and broadband wireless antennas solutions that cover 1.3 GHz-86 GHz for Point-to-Point and Point-to-Multipoint applications supporting all unlicensed & licensed band requirements.

4G and 5G, High-performance Test & Measurement solutions for mobile network Benchmarking, Optimization, Service Quality Monitoring, Interference Hunting, Data Management, and Analysis and Reporting.

Rugged and ultra-compact RF test solutions designed for field use. Spectrum analyzers to 87 GHz and signal sources up to 40 GHz. Analysis software for site verification, interference hunting, troubleshooting, and closeout reporting.

Highly secure keyless armored padlocks & keyless lock controllers, managed by a cloud-based platform with unlimited scalability. Easy to deploy and use, purpose-built for critical infrastructure access management and protection.

Scientific Lightning Solutions, LLC is a global leader in lightning science, analysis, engineering & protection. We offer our customers superior lightning-related monitoring products and consulting services.

Power solutions - AC, DC, and Data Surge/Signal protection, Power protection cabinets, Load Centers, Disconnects and Telco/NEMA boxes for 4G/5G Small/C-RAN & DAS. EMP/EMI filters, power conditioners, UPS & PDU's.

High-efficiency power electronics, including DC and AC energy conversion systems. Ruggedized power supplies, rectifiers, inverters and distribution panels for mission-critical power applications.
