TEST & MEASUREMENT LINE LIST

High performance connectivity solutions for Low Frequency, RF (Up to 70Ghz) and Fiber Optic applications, that include connectors, precision adapters, and high performance cable assemblies for Analog & Digital RF testing.

Filters, Combiners, Tower Mounted Amplifiers, DAS Interface Trays & Passive Intermodulation (PIM) test solutions.

Merging RFMD's and TriQuint's semi-conductor and foundry technologies for scalable & dynamic RF solutions for mobile, infrastructure and defense applications.

QPL & COTS Electromechanical Relays, Solid-State Relays, Space (Hi-Rel) Electromechanical Relays, RF & Microwave Relays & Coax Switches, Industrial Solid-State Relays, & Switching Matrices.

RF & Microwave products that include Integrated/Multi-Function Assemblies, Ferrites, Signal Control Products, Space Subassemblies, and Precise Time and Frequency Solutions.

Power & lightning protection for AC, DC, high speed data, signal, power protection cabinets, EMP | EMI filters, power conditioners, UPS and power distribution units.
